ABOUT ME

In my spare time I love to keep active by playing sports and going to the gym. My main sport is basketball, I've played it my entire life both for fun and also for the competitive streak. I have recently taken an interest in photography, I'm still in the learning stages but enjoying every moment of it. I like going out and socialising with friends and overall having a really good time. I also have spontaneous ideas for design websites like forums, freebies or a small business. I'm currently creating a PSD resource website were people can share, download and upload beautiful pixel designs.
